Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

		Application No.	Applicant(s)			
Office Action Summary		10/534,942	ZAJBER ET AL.			
		Examiner	Art Unit			
		Kuang Y. Lin	1725			
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status			. •			
•	Responsive to communication(s) filed on <u>06 August 2007</u> .					
,—	This action is <b>FINAL</b> . 2b) ☐ This action is non-final.					
3)[_]	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
<ul> <li>4)  Claim(s) 1 and 4-8 is/are pending in the application.</li> <li>4a) Of the above claim(s) is/are withdrawn from consideration.</li> <li>5)  Claim(s) is/are allowed.</li> <li>6)  Claim(s) 1 and 4-8 is/are rejected.</li> <li>7)  Claim(s) is/are objected to.</li> </ul>						
8) Claim(s) are subject to restriction and/or election requirement.						
Applicati	on Papers					
<ul> <li>9) The specification is objected to by the Examiner.</li> <li>10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.  Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).</li> <li>11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.</li> </ul>						
Priority under 35 U.S.C. § 119						
<ul> <li>12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).</li> <li>a) All b) Some * c) None of:</li> <li>1. Certified copies of the priority documents have been received.</li> <li>2. Certified copies of the priority documents have been received in Application No</li> <li>3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).</li> <li>* See the attached detailed Office action for a list of the certified copies not received.</li> </ul>

Art Unit: 1725

1. The drawings are objected to in that in numeral places there are several different elements represented by same reference numeral. For example, in figure 1, reference numeral 10 represents two dimensions. Also, reference numeral 12 represents two elements. Applicant is required to correct these and other errors which might occur in all of the drawings.

- 2. The specification is objected to under 35 USC 112, 1<sup>st</sup> paragraph in that the disclosure is written in a non-idiomatic expression such that renders the meaning vague and indefinite. For example, in page 2, line 16+ and page 7, line 1+, respectively, (amended), in what manner "the inner geometrical cross-section shape and the associated dimensions are set analogous to the locally deducible quantity of solidification heat"? In page 3, line 4+ and line 20+, (amended) and page 6, last paragraph (original), respectively, what is the "casting mirror area" and "area of the casting mirror"? In page 4, line 21 (amended), what shape is the "parabola-shaped recess declines in the direction toward the casting exit side"? In page 5, line 11+, and page 8, line 21+, respectively, (amended), what is the "plane-parallel surface"? In page 8, line 15 + (amended), what "contraction amount" is referred to? In page 8, line 21+ (amended), what is the meaning of "counter surface"? Also, there is a typographical error in the rest of the sentence.
- 3. Claims 1, and 4-8 are rejected under 35 USC 112, 1<sup>st</sup> paragraph for the same reasons as set forth in the objected to the specification supra.

Art Unit: 1725

4. Claims 1, and 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claim are written in a narrative format rather than an objective format and thereby they do not positively and directly include all the structural elements which are referred thereto, i.e. the shape or configuration of the mold is described in turn of the heat removing condition during casting process which is extraneous to the structure of the casting mold. In claim 1, the "cross-section form" shall be "cross-section shape". Also, what is "temperature progression diagram" and "heat dissipation diagram"? It is noted that in page 6, last paragraph of the specification, it states that diagram "D" shows the process during the dissipation of solidification heat from the casting. It is not clear how the diagram "D" shows the process during dissipation of solidification heat. In claim 4, what side of the mold (inner or external side) is referred to? In claim 7, what further structure limitation is claimed and what is "the contraction amount"? In claim 8, it is written in a non-idiomatic manner such that it is not clear what mold structure is claim.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

<sup>(</sup>a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/534,942

Art Unit: 1725

- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claims 1 and 8 **insofar as definite** are rejected under 35 U.S.C. 103(a) as being unpatentable over either US 6,340,048 to Tsune et al., or US 4,207,941 to Shrum and further in view of US 5,467,809 to Arvedi et al.

Each of the primary references substantially shows the invention as claimed except that they do not show to reduce the mold wall volume by means of notches. However, Arvedi et al. show to provide notches on the exterior of the mold wall such that to provide more coolant contacting surface and thereby to speed up the heat removal process. It would have been obvious to provide the notches of Arvedi et al. in the mold wall of the primary references in view of the advantage. Applicant is advised that the language of "locally deducible quantity of the solidification heat for the continuous casting", "progress of the temperature diagram across the mold height", "the dissipated heat quantity per time unit", etc. do not further provide any structural limitation for the continuous casting mold as claimed.

Art Unit: 1725

8. Claims 4-7 **insofar as definite** are rejected under 35 U.S.C. 103(a) as being unpatentable over either US 6,340,048 to Tsune et al., or US 4,207,941 to Shrum in view of US 5,467,809 to Arvedi et al. as applied to claim 1 above, and further in view of US 5,343,931 to Striuli et al.

Striuli et al. show a continuous casting mold containing a substantially central, approximately parabola-shaped recess for reducing of the concentration of tensions in the strand skin and lessening of tendency to tearing of strand skin during strand withdrawal process. It would have been obvious to further provide the continuous casting mold of the primary references with the central, approximately parabola-shaped recess of Striuli et al. in view of the advantage.

9. Applicant's arguments filed August 6, 2007 have been fully considered but they are not persuasive.

Applicant's main argument is that none of the prior art reference shows the claimed feature that a continuous casting mold having an inner geometrical cross-section form and associated dimensions that are designed analogous to a locally deducible quantity of a solidification heat for the continuous casting according to a temperature progression diagram along the mold height. However, these features constitute limitations only in a claim written in a process format. Thus, applicant's argument is moot.

10. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1725

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jonathan J. Johnson can be reached on 571-272-1177. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
